

I oppose bill HR 4026. XM is providing valuable content to its listeners. It is a pay service no different than cable TV. If HBO want's to provide local news casts in a certain city they can, this is no different. Weather and traffic are vital to every person daily routine in some form or another. We pay for the service and they give us what we want. FM and AM will not dissapear anytime soon since they are FREE! XM is a pay service and should be allowed to offer its listeners what they want.
